JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Addition/elimination reactions
Cyclic voltammetric and impedance spectrometric investigations on addition/elimination reactions of Lewis bases accompanying the electrode reactions of a nickel chelate complex with a structural resemblance to the coenzyme F430 (Jäger, Rudolph) 1
Adsorption
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part I (Rogozhnikov, Beck) 19
The mechanism of the electrochemical reaction of lysozyme at the mercury electrode (Jin, Xiao) 37
Irreversibly adsorbed As at full blockage on Pt(111) electrodes: surface stoichiometry (Orts et al.) 121
Adsorption isotherm
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part I (Rogozhnikov, Beck) 19
Aluminium
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153
2-Amino cyclopentene-1-dithiocarboxylate
Electrochemical oxidation of the Ni(II) complex of 2-amino cyclopentene-1-dithiocarboxylate at a Pt electrode (Safavi, Fotouhi) 93
Arsenic
Irreversibly adsorbed As at full blockage on Pt(111) electrodes: surface stoichiometry (Orts et al.) 121

Bioelectrochemistry
The mechanism of the electrochemical reaction of lysozyme at the mercury electrode (Jin, Xiao) 37
Biosensors
Tailoring the macroporosity and performance of sol–gel derived carbon composite glucose sensors (Wang et al.) 185
Bis(biphenyl)chromium(I)
Digital simulation of cyclic voltammetry in a two-electrode system and its application to the kinetics of bis(biphenyl)chromium(I) in *N*,*N*-dimethylformamide (Orlik) 139
5,5′-Bis[(6-methyl-2,2′-bipyridyl-6′-yl) methoxymethyl]-2,2′-bipyridine
Electrochemical characterization of a self-assembled double strand copper complex composed of three Cu^+ and two ligands containing bis(bipyridine)bithiophene (Greenwald et al.) 77
5,5′-Bis[(6-methyl-2,2′-bipyridyl-6′-yl)methoxymethyl]-2,2′-bithiophene
Electrochemical characterization of a self-assembled double strand copper complex composed of three Cu^+ and two ligands containing bis(bipyridine)bithiophene (Greenwald et al.) 77

Carbon composite
Tailoring the macroporosity and performance of sol–gel derived carbon composite glucose sensors (Wang et al.) 185
Carbon dioxide
Change in the product selectivity for the electrochemical CO_2 reduction by adsorption of sulfide ion on metal electrodes (Hara et al.) 239
Carbon monoxide
Electrochemical reactions of CO on polycrystalline copper electrodes (Hernández-R, Kalaji) 209
Carbonyls
Electrochemical reactions of CO on polycrystalline copper electrodes (Hernández-R, Kalaji) 209
Cell design
In situ FTIR spectroelectrochemistry of a microarray electrode (Zhang, Lin) 55
Chloroacidity
A comparative study of the electrochemistry of tin ions in the $ZnCl_2 + x$NaCl mixtures at 450°C (Castrillejo et al.) 43
Chronoabsorptometric transient
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
CO_2
Relationship between hydrocarbon production in the electrochemical reduction of CO_2 and the characteristics of the Cu electrode (Terunuma et al.) 69
Coenzyme F430
Cyclic voltammetric and impedance spectrometric investigations on addition/elimination reactions of Lewis bases accompanying the electrode reactions of a nickel chelate complex with a structural resemblance to the coenzyme F430 (Jäger, Rudolph) 1
Cold fusion
The maximum hydrogen (deuterium) loading ratio in the Pd|H_2O (D_2O) electrochemical system (Zhang et al.) 31
Conducting organic polymer
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
Copper
Electrochemical reactions of CO on polycrystalline copper electrodes (Hernández-R, Kalaji) 209
Copper electrode
Relationship between hydrocarbon production in the electrochemical reduction of CO_2 and the characteristics of the Cu electrode (Terunuma et al.) 69
Copper (I) complexes
Electrochemical characterization of a self-assembled double strand copper complex composed of three Cu^+ and two ligands containing bis(bipyridine)bithiophene (Greenwald et al.) 77
Corrosion
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
Cyanation
Electrochemical and XPS investigations of the anodic substitution of an electronic conducting polymer. Cyanation of poly[(1,4-dimethoxybenzene)-*co*-(3-methylthiophene)] (Fabre et al.) 225
Cyanide ion
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part I (Rogozhnikov, Beck) 19
Cyclic voltammetry
Cyclic voltammetric and impedance spectrometric investigations on addition/elimination reactions of Lewis bases accompanying the electrode reactions of a nickel chelate complex with a structural resemblance to the coenzyme F430 (Jäger, Rudolph) 1

Voltammetric studies of electrochemical processes at the interface Pt|YSZ between 300 and 600°C (Breiter et al.) 129
Digital simulation of cyclic voltammetry in a two-electrode system and its application to the kinetics of bis(biphenyl)chromium(I) in *N,N*-dimethylformamide (Orlik) 139

Diffusion coefficient
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
Digital simulation
Digital simulation of cyclic voltammetry in a two-electrode system and its application to the kinetics of bis(biphenyl)chromium(I) in *N,N*-dimethylformamide (Orlik) 139
Dimethoxybenzene
Electrochemical and XPS investigations of the anodic substitution of an electronic conducting polymer. Cyanation of poly[(1,4-dimethoxybenzene)-*co*-(3-methylthiophene)] (Fabre et al.) 225

Electric double layer
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part I (Rogozhnikov, Beck) 19
Electrocatalysis
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
Hydrolytic reactions in hydrated iridium chloride coatings (Kristóf et al.) 99
Tailoring the macroporosity and performance of sol–gel derived carbon composite glucose sensors (Wang et al.) 185
Electrochemical oxidation
Electrochemical oxidation of the Ni(II) complex of 2-amino cyclopentene-1-dithiocarboxylate at a Pt electrode (Safavi, Fotouhi) 93
Electrochemical reduction
Relationship between hydrocarbon production in the electrochemical reduction of CO_2 and the characteristics of the Cu electrode (Terunuma et al.) 69
Electrochemistry
A comparative study of the electrochemistry of tin ions in the $ZnCl_2 + x$NaCl mixtures at 450°C (Castrillejo et al.) 43
Electrochemical behavior of the Ln–Ni-oxide/Pt electrode in alkaline solution (Matsumoto et al.) 235
Electrode reaction rate
Digital simulation of cyclic voltammetry in a two-electrode system and its application to the kinetics of bis(biphenyl)chromium(I) in *N,N*-dimethylformamide (Orlik) 139
Electronic conducting polymer
Electrochemical and XPS investigations of the anodic substitution of an electronic conducting polymer. Cyanation of poly[(1,4-dimethoxybenzene)-*co*-(3-methylthiophene)] (Fabre et al.) 225
Electron transfer
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution – an electrochemical quartz crystal microbalance study (Sato et al.) 115
Electropolymerization
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153
Emission FTIR spectroscopy
Hydrolytic reactions in hydrated iridium chloride coatings (Kristóf et al.) 99
EQCM
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution – an electrochemical quartz crystal microbalance study (Sato et al.) 115

Experimental response
In situ FTIR spectroelectrochemistry of a microarray electrode (Zhang, Lin) 55

Ferricyanide
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
Ferrocene
Electrochemically mediated enzyme reaction of polyethyleneglycol-modified galactose oxidase in organic solvents (Yokoyama et al.) 217
11-Ferrocenylundecanethiol
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution – an electrochemical quartz crystal microbalance study (Sato et al.) 115
Ferrocyanide
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
in situ FTIR
Electrochemical reactions of CO on polycrystalline copper electrodes (Hernández-R, Kalaji) 209
FTIRS
Irreversibly adsorbed As at full blockage on Pt(111) electrodes: surface stoichiometry (Orts et al.) 121
FTIR spectroelectrochemistry
In situ FTIR spectroelectrochemistry of a microarray electrode (Zhang, Lin) 55

Galactose oxidase
Electrochemically mediated enzyme reaction of polyethyleneglycol-modified galactose oxidase in organic solvents (Yokoyama et al.) 217
Germanium activation
The electrocatalytic reduction of NO_3^- on Pt, Pd and Pt + Pd electrodes activated with Ge (Gootzen et al.) 171
Glucose
Tailoring the macroporosity and performance of sol–gel derived carbon composite glucose sensors (Wang et al.) 185
Gold electrode
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution – an electrochemical quartz crystal microbalance study (Sato et al.) 115

Helicate
Electrochemical characterization of a self-assembled double strand copper complex composed of three Cu^+ and two ligands containing bis(bipyridine)bithiophene (Greenwald et al.) 77
Hydrido complexes
Electrocatalytic reduction of CO_2 into formate with $[(\eta^5\text{-}Me_5C_5)M(L)Cl]^+$ complexes (L = 2,2′-bipyridine ligands; M = Rh(III) and Ir(III)) (Caix et al.) 163
Hydrocarbon
Relationship between hydrocarbon production in the electrochemical reduction of CO_2 and the characteristics of the Cu electrode (Terunuma et al.) 69
Hydrogen evolution reaction
The maximum hydrogen (deuterium) loading ratio in the Pd|H_2O (D_2O) electrochemical system (Zhang et al.) 31
Hydrolysis
Hydrolytic reactions in hydrated iridium chloride coatings (Kristóf et al.) 99

Impedance
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part I (Rogozhnikov, Beck) 19
Impedance spectroscopy
Cyclic voltammetric and impedance spectrometric investigations on addition/elimination reactions of Lewis bases accompanying the electrode reactions of a nickel chelate complex with a structural resemblance to the coenzyme F430 (Jäger, Rudolph) 1
Induced anion adsorption
Specific anion adsorption in the course of upd of Zn^{2+} ions on platinum (Horányi, Aramata) 201
Interface
Voltammetric studies of electrochemical processes at the interface Pt|YSZ between 300 and 600°C (Breiter et al.) 129
Ionic conductivity
Voltammetric studies of electrochemical processes at the interface Pt|YSZ between 300 and 600°C (Breiter et al.) 129
Iridium
Electrocatalytic reduction of CO_2 into formate with $[(\eta^5\text{-}Me_5C_5)M(L)Cl]^+$ complexes (L = 2,2′-bipyridine ligands; M = Rh(III) and Ir(III)) (Caix et al.) 163
Iron
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153

Kinetic parameters
A comparative study of the electrochemistry of tin ions in the $ZnCl_2 + x$NaCl mixtures at 450°C (Castrillejo et al.) 43

Lewis bases
Cyclic voltammetric and impedance spectrometric investigations on addition/elimination reactions of Lewis bases accompanying the electrode reactions of a nickel chelate complex with a structural resemblance to the coenzyme F430 (Jäger, Rudolph) 1
Ln–Ni-oxide
Electrochemical behavior of the Ln–Ni-oxide/Pt electrode in alkaline solution (Matsumoto et al.) 235
Loading ratio
The maximum hydrogen (deuterium) loading ratio in the Pd|H_2O (D_2O) electrochemical system (Zhang et al.) 31
Lysozyme
The mechanism of the electrochemical reaction of lysozyme at the mercury electrode (Jin, Xiao) 37

Mass transport
Mass transport accompanied with electron transfer between the gold electrode modified with 11-ferrocenylundecanethiol monolayer and redox species in solution – an electrochemical quartz crystal microbalance study (Sato et al.) 115
Mediator
Electrochemically mediated enzyme reaction of polyethyleneglycol-modified galactose oxidase in organic solvents (Yokoyama et al.) 217
Metal electrodes
Change in the product selectivity for the electrochemical CO_2 reduction by adsorption of sulfide ion on metal electrodes (Hara et al.) 239
Metal incorporation
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
Metallic substrate
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
3-Methylthiophene
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
Microarray electrode
In situ FTIR spectroelectrochemistry of a microarray electrode (Zhang, Lin) 55

Molten chlorides
A comparative study of the electrochemistry of tin ions in the $ZnCl_2 + x$NaCl mixtures at 450°C (Castrillejo et al.) 43

Nickel chelate complex
Cyclic voltammetric and impedance spectrometric investigations on addition/elimination reactions of Lewis bases accompanying the electrode reactions of a nickel chelate complex with a structural resemblance to the coenzyme F430 (Jäger, Rudolph) 1
Nickel(II)
Electrochemical oxidation of the Ni(II) complex of 2-amino cyclopentene-1-dithiocarboxylate at a Pt electrode (Safavi, Fotouhi) 93
Nitrate reduction
The electrocatalytic reduction of NO_3^- on Pt, Pd and Pt + Pd electrodes activated with Ge (Gootzen et al.) 171
N,*N*-Dimethylformamide
Digital simulation of cyclic voltammetry in a two-electrode system and its application to the kinetics of bis(biphenyl)chromium(I) in *N*,*N*-dimethylformamide (Orlik) 139
N,*N*,*N*′,*N*′-Tetramethyl-*p*-phenylenediamine
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105

Ohmic drops
Digital simulation of cyclic voltammetry in a two-electrode system and its application to the kinetics of bis(biphenyl)chromium(I) in *N*,*N*-dimethylformamide (Orlik) 139
Organic media
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153
Organic medium
Electrochemically mediated enzyme reaction of polyethyleneglycol-modified galactose oxidase in organic solvents (Yokoyama et al.) 217
Oxide film electrode
Hydrolytic reactions in hydrated iridium chloride coatings (Kristóf et al.) 99

Palladium
The electrocatalytic reduction of NO_3^- on Pt, Pd and Pt + Pd electrodes activated with Ge (Gootzen et al.) 171
Pd|D system
The maximum hydrogen (deuterium) loading ratio in the Pd|H_2O (D_2O) electrochemical system (Zhang et al.) 31
Pd|H system
The maximum hydrogen (deuterium) loading ratio in the Pd|H_2O (D_2O) electrochemical system (Zhang et al.) 31
Perovskites
Electrochemical behavior of the Ln–Ni-oxide/Pt electrode in alkaline solution (Matsumoto et al.) 235
Phenothiazine
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
Platinum
The electrocatalytic reduction of NO_3^- on Pt, Pd and Pt + Pd electrodes activated with Ge (Gootzen et al.) 171
Electrochemical behavior of the Ln–Ni-oxide/Pt electrode in alkaline solution (Matsumoto et al.) 235
Polyethyleneglycol modified enzyme
Electrochemically mediated enzyme reaction of polyethyleneglycol-modified galactose oxidase in organic solvents (Yokoyama et al.) 217
Polythiophene
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153

Pt(111)
Irreversibly adsorbed As at full blockage on Pt(111) electrodes: surface stoichiometry (Orts et al.) 121
Pt electrode
Specific anion adsorption in the course of upd of Zn^{2+} ions on platinum (Horányi, Aramata) 201

Radiotracer technique
Specific anion adsorption in the course of upd of Zn^{2+} ions on platinum (Horányi, Aramata) 201
Reaction mechanism
The mechanism of the electrochemical reaction of lysozyme at the mercury electrode (Jin, Xiao) 37
Reduction
Change in the product selectivity for the electrochemical CO_2 reduction by adsorption of sulfide ion on metal electrodes (Hara et al.) 239
Reduction of CO_2
Electrocatalytic reduction of CO_2 into formate with $[(\eta^5\text{-}Me_5C_5)M(L)Cl]^+$ complexes (L = 2,2′-bipyridine ligands; M = Rh(III) and Ir(III)) (Caix et al.) 163
Rhodium
Electrocatalytic reduction of CO_2 into formate with $[(\eta^5\text{-}Me_5C_5)M(L)Cl]^+$ complexes (L = 2,2′-bipyridine ligands; M = Rh(III) and Ir(III)) (Caix et al.) 163

Secondary ion mass spectrometry
Hydrolytic reactions in hydrated iridium chloride coatings (Kristóf et al.) 99
Selectivity
Change in the product selectivity for the electrochemical CO_2 reduction by adsorption of sulfide ion on metal electrodes (Hara et al.) 239
Self assembly
Electrochemical characterization of a self-assembled double strand copper complex composed of three Cu^+ and two ligands containing bis(bipyridine)bithiophene (Greenwald et al.) 77
Silver
Thermodynamics and kinetics of adsorption of cyanide ions on silver. Part I (Rogozhnikov, Beck) 19
Sol–gel
Tailoring the macroporosity and performance of sol–gel derived carbon composite glucose sensors (Wang et al.) 185
Spectroelectrochemistry
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
Stabilized zirconia
Voltammetric studies of electrochemical processes at the interface Pt|YSZ between 300 and 600°C (Breiter et al.) 129
STM
Irreversibly adsorbed As at full blockage on Pt(111) electrodes: surface stoichiometry (Orts et al.) 121
Sulfide ion
Change in the product selectivity for the electrochemical CO_2 reduction by adsorption of sulfide ion on metal electrodes (Hara et al.) 239
Supramolecular chemistry
Electrochemical characterization of a self-assembled double strand copper complex composed of three Cu^+ and two ligands containing bis(bipyridine)bithiophene (Greenwald et al.) 77
Surface blockage
Irreversibly adsorbed As at full blockage on Pt(111) electrodes: surface stoichiometry (Orts et al.) 121

2,3,5,6-Tetrabromo-1,4-benzoquinone
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
2,3,5,6-Tetrachloro-1,4-benzoquinone
Applications of the channel flow cell for UV–visible spectroelectrochemical studies. Part 3. Do radical cations and anions have similar diffusion coefficients to their neutral parent molecules? (Wang et al.) 105
Theoretical model
In situ FTIR spectroelectrochemistry of a microarray electrode (Zhang, Lin) 55
Thermal analysis
Hydrolytic reactions in hydrated iridium chloride coatings (Kristóf et al.) 99
Thick film electrodes
Tailoring the macroporosity and performance of sol–gel derived carbon composite glucose sensors (Wang et al.) 185
Thiophene
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153
Tin chlorides
A comparative study of the electrochemistry of tin ions in the $ZnCl_2 + x$NaCl mixtures at 450°C (Castrillejo et al.) 43

Upd
Specific anion adsorption in the course of upd of Zn^{2+} ions on platinum (Horányi, Aramata) 201

Voltammetry
The mechanism of the electrochemical reaction of lysozyme at the mercury electrode (Jin, Xiao) 37

XPS
Metal ion incorporation in the conducting polymer electrode matrix using an 'active' metal substrate (Marawi et al.) 61
Electrochemical and XPS investigations of the anodic substitution of an electronic conducting polymer. Cyanation of poly[(1,4-dimethoxybenzene)-*co*-(3-methylthiophene)] (Fabre et al.) 225
X-ray photoelectron spectroscopy
Relationship between hydrocarbon production in the electrochemical reduction of CO_2 and the characteristics of the Cu electrode (Terunuma et al.) 69

Zinc
Electropolymerization of thiophene on oxidizable metals in organic media (Aeiyach et al.) 153
Zinc chlorides
A comparative study of the electrochemistry of tin ions in the $ZnCl_2 + x$NaCl mixtures at 450°C (Castrillejo et al.) 43
Zn^{2+} ions
Specific anion adsorption in the course of upd of Zn^{2+} ions on platinum (Horányi, Aramata) 201
